Subject Index of Volume 52

Acetonitrile
complete oxidation of, on Ag(110): catalytic oxidation of $-CH_2CN$, 211
Alcohols
2-arylethanols by reaction of benzyl halides with CO/H_2 using Co–Rh bimetallic catalytic system; synthesis of, L17
ethanol formation from ethane with *Methylosinus trichosporium*(OB3b), L37
mechanism for transfer hydrogenation of ketones to, catalyzed by hydridotriironundecacarbonylate anion under phase transfer conditions, 301
'$Pd(OAc)_2$–PPh_3–CF_3COOH/H_2' system; determination of key intermediates for homogeneous water–gas shift reaction and hydrocarbonylation of ethylene to diethyl ketone catalyzed by, 27
phenol; correlation of vanadia–chromia catalyst composition with acidity and selective C-alkylation of, L29
2-propanol; photocatalytic dehydrogenation of, with carbonyl (halogen) phosphine–Rh complexes, 99
Alkanes
cyclohexane, 1,3-cyclohexadiene, cyclohexene and ethylbenzene with *cis*-$[PtCl_2(SnCl_3)_2]^{2-}$ complex; thermal dehydrogenation of, L41
ethane; ethanol formation from, with *Methylosinus trichosporium*(OB3b), L37
methane and other species; catalytic reduction of CO_2 to, via formamide intermediation; synthesis and hydrogenation of $HC(O)NH_2$ in presence of $[Ir(Cl)(CO)(Ph_3P)_2]$, L11
Alkenes, Olefins
alkene epoxidation; bimetallic Mo–rare earth complexes as catalysts of, L1
1,3-cyclohexadiene, cyclohexene, cyclohexane and ethylbenzene with *cis*-$[PtCl_2(SnCl_3)_2]^{2-}$ complex; thermal dehydrogenation of, L41
ethylene; determination of key intermediates for homogeneous water–gas shift reaction and hydrocarbonylation of, to diethyl ketone catalyzed by '$Pd(OAc)_2$–PPh_3–CF_3COOH/H_2' system, 27
ethylene dimerization on low-valent lanthanide catalysts prepared by metal vaporization technique, L25
organic allyl moieties: carbonylation of; case of methoxyoctadienes and role of M^+Y^- cocatalysis (M = H, R_4N; Y = halide, BF_4), 263
ortho-nitrophenylallyl ether with CO; Ru carbonyl-catalyzed reduction of, L47
Alkylation
correlation of vanadia–chromia catalyst composition with acidity and selective C-alkylation of phenol, L29
Alloy
correlation between surface structure of bimetallic or alloy catalysis and hydrocarbon skeletal rearrangement mechanisms: approach to nature of active sites and to reaction intermediates, 147
Alumina
formation and reactivities of formate species on K-modified Os/alumina catalyst: IR spectroscopic study, 113
molecular orbital calculations for surface-bound metal species: Rh(I) dicarbonyls on alumina or silica, 253
Ammonia
in situ formation of Ru(II) dinitrogen complex $[Ru^{II}(H-EDTA)N_2]^-$ and its reduction to, by visible light irradiation of Pt or Rh loaded CdS particulate system in presence of EDTA as sacrificial electron donor, L5
Antimony
evidence of migration of oxygen species from Sb_2O_4 to MoO_3 in MoO_3–Sb_2O_4 selective oxidation catalysts, 349

© Elsevier Sequoia/Printed in The Netherlands

Aromatic compounds
2-arylethanols by reaction of benzyl halides with CO/H_2 using Co–Rh bimetallic catalytic system; synthesis of, L17
ethylbenzene, 1,3-cyclohexadiene, cyclohexene and cyclohexane with *cis*-$[PtCl_2(SnCl_3)_2]^{2-}$ complex; thermal dehydrogenation of, L41
$[Ir(Cl)(CO)(Ph_3P)_2]$; synthesis and hydrogenation of $HC(O)NH_2$ in presence of; catalytic reduction of CO_2 to methane and other species via formamide intermediation, L11
N-(5-dimethylaminonaphthalene-1-sulphonyl)-3-aminobenzene boronic acid as an active-site-directed fluorescent probe of bile-salt-stimulated human milk lipase, 317
nitrobenzene; reduction of, by dodecacarbonyl tri-iron under triphase conditions, 297
ortho-nitrophenylallyl ether; Ru carbonyl-catalyzed reduction of, with CO, L47
oxobridged Ru dimer $L_2(H_2O)Ru^{III}$—O—$Ru^{III}(H_2O)L_2$, L = 2,2′-bipyridyl-4,4′-dicarboxylate; artificial analogues of oxygen-evolving complex in photosynthesis, 63
'$Pd(OAc)_2$–PPh_3–CF_3COOH/H_2' system; determination of key intermediates for homogeneous water–gas shift reaction and hydrocarbonylation of ethylene to diethyl ketone catalyzed by, 27
phenol; correlation of vanadia–chromia catalyst composition with acidity and selective C-alkylation of, L29
styrene; zeolite catalysis in selective oligomerization of, 375
xylene: isomerization of; MINDO/3 study of cyclization of benzenium cation into bicyclo[3.1.0]hexenyl cation, 277

Bioreactor
'composite membrane': physico-chemical characterization, 299
Boronic acid
N-(5-dimethylaminonaphthalene-1-sulphonyl)-3-aminobenzene, as an active-site-directed fluorescent probe of bile-salt-stimulated human milk lipase, 317

Cadmium
in situ formation of Ru(II) dinitrogen complex $[Ru^{II}(H—EDTA)N_2]^-$ and its reduction to NH_3 by visible light irradiation of Pt or Rh loaded CdS particulate system in presence of EDTA as sacrificial electron donor, L5
Carbon dioxide
catalytic reduction of, to methane and other species via formamide intermediation: synthesis and hydrogenation of $HC(O)NH_2$ in presence of $[Ir(Cl)(CO)(Ph_3P)_2]$, L11
Carbon monoxide
behaviour of highly-dispersed metallic iron catalysts during exposure to, 387
Ru carbonyl-catalyzed reduction of *ortho*-nitrophenylallyl ether with, L47
synthesis of 2-arylethanols by reaction of benzyl halides with CO/H_2 using Co–Rh bimetallic catalytic system, L17
Carbonyl
molecular orbital calculations for surface-bound metal species: Rh(I) dicarbonyls on alumina or silica, 253
photocatalytic dehydrogenation of 2-propanol with carbonyl(halogeno) phosphine–Rh complexes, 99
reduction of nitrobenzene by dodecacarbonyl tri-iron under triphase conditions, 297
Ru carbonyl-catalyzed reduction of *ortho*-nitrophenylallyl ether with CO, L47
Carbonylation
of organic allyl moieties: case of methoxyoctadienes and role of M^+Y^- cocatalysis (M = H, R_4N; Y = halide, BF_4), 263
Chromia
correlation of vanadia–chromia catalyst composition with acidity and selective C-alkylation of phenol, L29
Clusters
iron; effect of hydroxyl group content of silica gel on charge of, prepared by solvated metal atom deposition techniques, 241
prereduced Pt, in supercages: effect of; mechanism of particle formation in

decomposing $Re_2(CO)_{10}$ on NaY and NaHY zeolites, 193
Cobalt
synthesis of 2-arylethanols by reaction of benzyl halides with CO/H_2 using Co–Rh bimetallic catalytic system, L17
Cocatalysis
carbonylation of organic allyl moieties: case of methoxyoctadienes and role of M^+Y^- cocatalysis (M = H, R_4N; Y = halide, BF_4), 263
Cyclization
MINDO/3 study of, of benzenium cation into bicyclo[3.1.0]hexenyl cation; isomerization of xylene, 277

Dehydrogenation
photocatalytic, of 2-propanol with carbonyl(halogeno) phosphine–Rh complexes, 99
thermal, of 1,3-cyclohexadiene, cyclohexene, cyclohexane and ethylbenzene with *cis*-$[PtCl_2(SnCl_3)_2]^{2-}$ complex, L41
Dimerization
ethylene, on low-valent lanthanide catalysts prepared by metal vaporization technique, L25
DNase activity
influence of organic–aqueous media in, of micrococcal endonuclease, 323

Epoxidation
olefin; bimetallic Mo–rare earth complexes as catalysts of, L1
Ether
Ru carbonyl-catalyzed reduction of *ortho*-nitrophenylallyl ether with CO, L47

Fluorescence
N-(5-dimethylaminonaphthalene-1-sulphonyl)-3-aminobenzene boronic acid as an active-site-directed fluorescent prove of bile-salt stimulated human milk lipase, 317
Formamide intermediation
catalytic reduction of CO_2 to methane and other species via: synthesis and hydrogenation of $HC(O)NH_2$ in presence of $[Ir(Cl)(CO)(Ph_3P)_2]$, L11
Formate species
formation and reactivities of, on K-modified Os/alumina catalyst: IR spectroscopic study, 113

Halides
benzyl; synthesis of 2-arylethanols by reaction of, with CO/H_2 using Co–Rh bimetallic catalytic system, L17
carbonylation of organic allyl moieties: case of methoxyoctadienes and role of M^+Y^- cocatalysis (M = H, R_4N; Y = halide, BF_4), 263
Halogeno compounds
photocatalytic dehydrogenation of 2-propanol with carbonyl(halogeno) phosphine–Rh complexes, 99
Hydrocarbons
correlation between surface structure of bimetallic or alloy catalysts and hydrocarbon skeletal rearrangement mechanisms: approach to nature of active sites and to reaction intermediates, 147
effect on reactions of; modification of metal catalysts by V compounds, 129
Hydrocarbonylation
of ethylene to diethyl ketone catalyzed by '$Pd(OAc)_2$–PPh_3–CF_3COOH/H_2' system and determination of key intermediates for homogeneous water–gas shift reaction, 27
Hydrogen
photoinduced, evolution with viologen-linked anionic zinc porphyrins, L33
synthesis of 2-arylethanols by reaction of benzyl halides with CO/H_2 using Co–Rh bimetallic catalytic system, L17
Hydrogenation
and synthesis of $HC(O)NH_2$ in presence of $[Ir(Cl)(CO)(Ph_3P)_2]$; catalytic reduction of CO_2 to methane and other species via formamide intermediation, L11
transfer; mechanism for, of ketones to alcohols catalyzed by hydridotriironundecacarbonylate anion under phase transfer conditions, 301

Iridium
catalytic reduction of CO_2 to methane and other species via formamide intermediation: synthesis and hydrogenation of $HC(O)NH_2$ in pres-

ence of [Ir(Cl)(CO)(Ph_3P)$_2$], L11
Iron
behaviour of highly-dispersed metallic iron catalysts during exposure to CO, 387
effect of hydroxyl group content of silica gel on charge of iron clusters prepared by solvated metal atom deposition techniques, 241
mechanism for transfer hydrogenation of ketones to alcohols catalyzed by hydridotriironundecacarbonylate anion under phase transfer conditions, 301
reduction of nitrobenzene by dodecacarbonyl tri-iron under triphase conditions, 297
Irradiation
visible light; *in situ* formation of Ru(II) dinitrogen complex [Ru^{II}(H–EDTA)N_2]$^-$ and its reduction to NH by, of Pt or Rh loaded CdS particulate system in presence of EDTA as sacrificial electron donor, L5
Isomerization
of methyl linoleate on Ru(III)–alkoxide complex, 305
of xylene: MINDO/3 study of cyclization of benzenium cation into bicyclo[3.1.0]hexenyl cation, 277

Ketones
determination of key intermediates for homogeneous water–gas shift reaction and hydrocarbonylation of ethylene to diethyl ketone catalyzed by '$Pd(OAc)_2$–PPh_3–CF_3COOH/H_2' system, 27
mechanism for transfer hydrogenation of, to alcohols catalyzed by hydridotriironundecacarbonylate anion under phase transfer conditions, 301

Lanthanide
ethylene dimerization on low-valent lanthanide catalysts prepared by metal vaporization technique, L25
Linoleate
methyl; isomerization of, on Ru(III)–alkoxide complex, 305
Lipase
N-(5-dimethylaminonaphthalene-1-sulphonyl)-3-aminobenzene boronic acid as an active-side-directed fluorescent probe of bile-salt-stimulated human milk lipase, 317

Mangenese complexes
catalytic and photocatalytic oxygen evolution from water in presence of, 49
Membrane
'composite membrane' bioreactor: physico-chemical characterization, 229
Metalloporphyrins
reactivity–structure correlations in oxidation with, 85
Methyl linoleate
isomerization of, on Ru(III)–alkoxide complex, 305
Methylosinus trichosporium(OB3b)
ethanol formation from ethane with, L37
Micrococcal endonuclease
influence of organic–aqueous media in DNase activity of, 323
Microporosity
implicit and explicit, in heteropoly oxometalates, 169
Milk
N-(5-dimethylaminonaphthalene-1-sulphonyl)-3-aminobenzene boronic acid as an active-site-directed fluorescent probe of bile-salt-stimulated human milk lipase, 317
MINDO/3 study
of cyclization of benzenium cation into bicyclo[3.1.0]hexenyl cation; isomerization of xylene, 277
Molecular orbital calculations
for surface-bound metal species: Rh(I) dicarbonyls on alumina or silica, 253
Molybdenum
bimetallic Mo–rare earth complexes as catalysts of olefin epoxidation, L1
evidence of migration of oxygen species from Sb_2O_4 to MoO_3 in MoO_3–Sb_2O_4 selective oxidation catalysts, 349
highly dispersed molybdenum sulphide catalysts prepared from $Mo(CO)_6$ encaged in zeolite, 337

Olefins: see Alkenes
Oligomerization
selective; zeolite catalysis in, of styrene, 375

Organometallics
organometallic complexes as catalyst precursors: advantages and disadvantages, 19
supported, and supported metals, 1
Osmium
formation and reactivities of formate species on K-modified Os/alumina catalyst: Ir spectroscopic study, 113
Oxidation
complete, of acetonitrile on Ag(110): catalytic oxidation of $-CH_2CN$, 211
evidence of migration of oxygen species from Sb_2O_4 to MoO_3 in MoO_3–Sb_2O_4 selective oxidation catalysts, 349
reactivity–structure correlations in, with metalloporphyrins, 85
Oxometalates
heteropoly; implicit and explicit microporosity in, 169
Oxygen
artificial analogues of oxygen-evolving complex in photosynthesis: oxo-bridged Ru dimer $L_2(H_2O)Ru^{III}(H_2O)L_2$, L = 2,2′-bipyridyl-4,4′-dicarboxylate, 63
catalytic and photocatalytic, evolution from water in presence of Mn complexes, 49
evidence of migration of oxygen species from Sb_2O_4 to MoO_3 in MoO_3–Sb_2O_4 selective oxidation catalysts, 349

Palladium
determination of key intermediates for homogeneous water–gas shift reaction and hydrocarbonylation of ethylene to diethyl ketone catalyzed by'$Pd(OAc)_2$–PPh_3–CF_3COOH/H_2' system, 27
Phosphorus
chiral sulphonated phosphines: Rh(I)–tetrasulphonated diphosphine complex; homogeneous or heterogeneous catalyst, L21
photocatalytic dehydrogenation of 2-propanol with carbonyl (halogeno) phosphine–Rh complexes, 99
Photocatalysis
catalytic and photocatalytic oxygen evolution from water in presence of Mn complexes, 49
photocatalytic dehydrogenation of 2-propanol with carbonyl (halogeno) phosphine–Rh complexes, 99
Photosynthesis
artificial analogues of oxygen-evolving complex in: oxobridged Ru dimer $L_2(H_2O)Ru^{III}—O—Ru^{III}(H_2O)L_2$, L = 2,2′-bipyridyl-4,4′-dicarboxylate, 63
Platinum
in situ formation of Ru(II) dinitrogen complex $[Ru^{III}(H—EDTA)N_2]^-$ and its reduction to NH_3 by visible light irradiation of Pt or Rh loaded CdS particulate system in presence of EDTA as sacrificial electron donor, L5
mechanism of particle formation in decomposing $Re_2(CO)_{10}$ on NaY and NaHY zeolites: effect of prereduced Pt clusters in supercages, 193
thermal dehydrogenation of 1,3-cyclohexadiene, cyclohexene, cyclohexane and ethylbenzene with *cis*-$[PtCl_2(SnCl_3)_2]^{2-}$ complex, L41
Porphyrins
metallo-; reactivity–structure correlations in oxidation with, 85
viologen-linked anionic zinc; photo-induced hydrogen evolution with, L33
Potassium
formation and reactivities of formate species on K-modified Os/alumina catalyst: IR spectroscopic study, 113

Rare earth complexes
bimetallic Mo–, as catalysts of olefin epoxidation, L1
Reduction
catalytic, of CO_2 to methane and other species via formamide intermediation: synthesis and hydrogenation of $HC(O)NH_2$ in presence of $[Ir(Cl)(CO)(Ph_3P)_2]$, L11
of nitrobenzene by dodecacarbonyl tri-iron under triphase conditions, 297
Ru carbonyl-catalyzed, of *ortho*-nitrophenylallyl ether with CO, L47
Rhenium
mechanism of particle formation in decomposing $Re_2(CO)_{10}$ on NaY and NaHY zeolites: effect of pre-

reduced Pt clusters in supercages, 193
Rhodium
chiral sulphonated phosphines: Rh(I)–tetrasulphonated diphosphine complex; homogeneous or heterogeneous catalyst, L21
in situ formation of Ru(II) dinitrogen complex $[Ru^{II}(H—EDTA)N_2]^-$ and its reduction to NH_3 by visible light irradiation of Pt or Rh loaded CdS particulate system in presence of EDTA as sacrificial electron donor, L5
molecular orbital calculations for surface-bound metal species: Rh(I) dicarbonyls on alumina or silica, 253
photocatalytic dehydrogenation of 2-propanol with carbonyl (halogeno) phosphine–Rh complexes, 99
synthesis of 2-arylethanols by reaction of benzyl halides with CO/H_2 using Co–Rh bimetallic catalytic system, L17
Ruthenium
artificial analogues of oxygen-evolving complex in photosynthesis: oxo-bridged Ru dimer $L_2(H_2O)Ru^{III}—O—Ru^{III}(H_2O)L_2$, L = 2,2′-bipyridyl-4,4′-dicarboxylate, 63
in situ formation of Ru(II) dinitrogen complex $[Ru^{II}(H—EDTA)N_2]^-$ and its reduction to NH_3 by visible light irradiation of Pt or Rh loaded CdS particulate system in presence of EDTA as sacrificial electron donor, L5
isomerization of methyl linoleate on Ru(III)–alkoxide complex, 305
Ru carbonyl-catalyzed reduction of *ortho*-nitrophenylallyl ether with CO, 47

Silica
effect of hydroxyl group content of silica gel on charge of iron clusters prepared by solvated metal atom deposition techniques, 241
molecular orbital calculations for surface-bound metal species: Rh(I) dicarbonyls on alumina or silica, 253
Silver
complete oxidation of acetonitrile on Ag(110): catalytic oxidation of $—CH_2CN$, 211
Sodium
mechanism of particle formation in decomposing $Re_2(CO)_{10}$ on NaY and NaHY zeolites: effect of pre-reduced Pt clusters in supercages, 193
Spectroscopy
IR study: formation and reactivities of formate species on K-modified Os/alumina catalyst, 113
Sulphur
catalytic and surface properties of ZrO_2 modified with sulphur compounds, 361
chiral sulphonated phosphines: Rh(I)–tetrasulphonated diphosphine complex; homogeneous or heterogeneous catalyst, L21
highly dispersed molybdenum sulphide catalysts prepared from $Mo(CO)_6$ encaged in zeolite, 337
in situ formation of Ru(II) dinitrogen complex $[Ru^{II}(H—EDTA)N_2]^-$ and its reduction to NH_3 by visible light irradiation of Pt or Rh loaded CdS particulate system in presence of EDTA as sacrificial electron donor, L5
N-(5-dimethylaminonaphthalene-1-sulphonyl)-3-aminobenzene boronic acid as an active-site-directed fluorescent probe of bile-salt-stimulated human milk lipase, 317
Supported metals
and supported organometallics, 1
Surface-bound metal species
molecular orbital calculations for: Rh(I) dicarbonyls on alumina or silica, 253
Surface properties
and catalytic properties of ZrO_2 modified with sulphur compounds, 361
Surface structure
correlation between, of bimetallic or alloy catalysts and hydrocarbon skeletal rearrangement mechanisms: approach to nature of active sites and to reaction intermediates, 147
Synthesis
of 2-arylethanols by reaction of benzyl halides with CO/H_2 using Co–Rh bimetallic catalytic system, L17
and hydrogenation of $HC(O)NH_2$ in presence of $[Ir(Cl)(CO)(Ph_3P)_2]$; catalytic reduction of CO_2 to

methane and other species via formamide intermediation, L11

Tin
thermal dehydrogenation of 1,3-cyclohexadiene, cyclohexene, cyclohexane and ethylbenzene with *cis*-$[PtCl_2(SnCl_3)_2]^{2-}$ complex, L41

Vanadium
correlation of vanadia–chromia catalyst composition with acidity and selective C-alkylation of phenol, L29
modification of metal catalysts by V compounds: effect on reactions of hydrocarbons, 129

Viologen
photoinduced hydrogen evolution with viologen-linked anionic zinc porphyrins, L33

Water
catalytic and photocatalytic oxygen evolution from, in presence of Mn complexes, 49
determination of key intermediates for homogeneous water–gas shift reaction and hydrocarbonylation of ethylene to diethyl ketone catalyzed by '$Pd(OAc)_2$–PPh_3–CF_3COOH/H_2' system, 27

Yttrium
mechanism of particle formation in decomposing $Re_2(CO)_{10}$ on NaY and NaHY zeolites: effect of pre-reduced Pt clusters in supercages, 193

Zeolite
catalysis in selective oligomerization of styrene, 375
highly dispersed molybdenum sulphide catalysts prepared from $Mo(CO)_6$ encaged in, 337
mechanism of particle formation in decomposing $Re_2(CO)_{10}$ on NaY and NaHY zeolites: effect of pre-reduced Pt clusters in supercages, 193

Zinc
photoinduced hydrogen evolution with viologen-linked anionic zinc porphyrins, L33

Zirconium
catalytic and surface properties of ZrO_2 modified with sulphur compounds, 361
